# Table of Contents

## Foreword

## Preface

## Acknowledgment

## SECTION I: Efficient Managerial Decision-Making and Management of Operations

### Chapter 1. Efficient Managerial Decision-Making in Healthcare Settings: Examples and Fundamental Principles
Alexander Kolker (Children's Hospital and Health System, Wisconsin, USA)

### Chapter 2. Dynamic Capacity Management (DCAMM) in a Hospital Setting
Pierce Story (GE Healthcare, USA)

### Chapter 3. Simulation Modeling of Healthcare Delivery
Ian W. Gibson (Health Delivery Modeling, Australia)

### Chapter 4. Simulation Applications in a Healthcare Setting
Roque Perez-Velez (Management Engineering Consulting Services, USA)

### Chapter 5. Modeling Clinical Engineering Activities to Support Healthcare Technology Management
Laura Gaetano (Politecnico di Torino, Italy), Daniele Puppato (AReSS Piemonte, Italy), and Gabriella Balestra (Politecnico di Torino, Italy)

### Chapter 6. Intensive Care Unit Operational Modeling and Analysis
Yue Dong (Mayo Clinic, USA), Huitian Lu (South Dakota State University, USA), Ognjen Gajic (Mayo Clinic, USA), and Brian Pickering (Mayo Clinic, USA)

### Chapter 7. Human-Centered Systems Engineering: Managing Stakeholder Dissonance in Healthcare Delivery
GM Samaras (Samaras & Associates, Inc., USA)

### Chapter 8. Enabling Real-Time Management and Visibility with RFID
Peter J. Hawrylak (The University of Tulsa, USA), Ajay Ogirala (University of Pittsburgh, USA), Bryan A. Norman (University of Pittsburgh, USA), Jayant Rajgopal (University of Pittsburgh, USA), and Marlin H. Mickle (University of Pittsburgh, USA)

### Chapter 9. Healthcare Delivery as a Service System: Barriers to Co-Production and Implications of Healthcare Reform
Arjun Parasher (Leonard M. Miller School of Medicine, USA), Pascal J. Goldschmidt-Clermont (Leonard M. Miller School of Medicine, USA), and James M. Tien (University of Miami, USA)

## SECTION II: Outpatient Clinic Management and Scheduling

### Chapter 10. Using Simulation to Design and Improve an Outpatient Procedure Center
Todd R. Huschka (Mayo Clinic, USA), Thomas R. Rohleder (Mayo Clinic, USA), and Brian T. Denton (North Carolina State University, USA)

### Chapter 11. Reducing Consultation Waiting Time and Overtime in Outpatient Clinic: Challenges and Solutions
Zhu Zhecheng (Health Services & Outcomes Research, Singapore), Heng Bee Hoon (Health Services & Outcomes Research, Singapore), and Teow Kiok Liang (Health Services & Outcomes Research, Singapore)

### Chapter 12. Reducing Patient Waiting Time at an Ambulatory Surgical Center
David Ben-Arieh (Kansas State University, USA), and Chih-Hang Wu (Kansas State University, USA)

### Chapter 13. Scheduling Healthcare Systems: Theory and Applications
Arben Asllani (The University of Tennessee - Chattanooga, USA)
Chapter 14. Appointment Order Outpatient Scheduling System with Consideration of Ancillary Services and Overbooking Policy to Improve Outpatient Experience
Yu-Li Huang (New Mexico State University, USA)

SECTION III: Electronic Health Records

Chapter 15. Electronic Health Record: Adoption, Considerations and Future Direction
Janine R. A. Kamath (Mayo Clinic, USA), and Amerett L. Donahoe-Anshus (Mayo Clinic, USA)

Chapter 16. Electronic Medical Records (EMR): Issues and Implementation Perspectives
Dean E. Johnson (Wellsprin Health, USA)

Chapter 17. Health Information Exchange for Improving the Efficiency and Quality of Healthcare Delivery
Jing Shi (North Dakota State University, USA), Sudhindra Upadhyaya (North Dakota State University, USA), and Ergin Erdem (North Dakota State University, USA)

SECTION IV: Patient Flow

Chapter 18. Evaluating Patient Flow Based on Waiting Time and Travel Distance for Outpatient Clinic Visits
S Reza Sajjadi (North Dakota State University, USA), Jing Shi (North Dakota State University, USA), and Kambiz Farahmand (North Dakota State University, USA)

Chapter 19. Using Patient Flow to Examine Hospital Operations
Renata Konrad (Worcester Polytechnic Institute, USA), Beste Kucukyazici (Zaragoza Logistics Center, Spain), and Mark Lawley (Purdue University, USA)

SECTION V: Cost Management

Chapter 20. A New Cost Accounting Model and New Indicators for Hospital Management Based on Personnel Cost
Yoshiaki Nakagawa (Kyoto University, Japan), Hiroyuki Yoshihara (Kyoto University, Japan), and Yoshinobu Nakagawa (Kagawa National Children’s Hospital, Japan)
