

Disease Gene Identification: Methods and Protocols

DiStefano, Johanna K.

ISBN-13: 9781617379536

Table of Contents

Part I: Introduction

1. Technological Issues and Experimental Design of Gene Association Studies
Johanna K. DiStefano and Darin M. Taverna

2. Statistical Issues in Gene Association Studies
Richard M. Watanabe

3. Identification of Causal Sequence Variants of Disease in the Next Generation Sequencing Era
Christopher B. Kingsley

Part II: Methods for Gene Identification

4. Microarray-Based Genome-Wide Association Studies Using Pooled DNA
Szabolcs Szelingher, John V. Pearson, and David W. Craig

5. Medium-Throughput SNP Genotyping Using Mass Spectrometry: Multiplex SNP Genotyping Using the iPLEX[®] Gold Assay
Meredith P. Millis

6. Targeted SNP Genotyping Using the TagMan[®] Assay
Dorit Schleinitz, Johanna K. DiStefano, and Peter Kovacs

7. Bar-Coded, Multiplexed Sequencing of Targeted DNA Regions Using the Illumina Genome Analyzer
Szabolcs Szelingher, Ahmet Kurdoglu, and David W. Craig

Part III: Functional Characterization of Susceptibility Alleles and Loci

8. Site-Directed Mutagenesis
Patricia E. Carrigan, Petek Ballar, and Sukru Tuzmen

9. Gene Expression Profiling of Tissues and Cell Lines: A Dual Color Microarray Method
Sonsoles Shack

10. Methods for microRNA Microarray Profiling
Aarati R. Ranade and Glen J. Weiss

11. Allelic Expression Profiling to Dissect Genome-Wide Association Study Signals
Jonathan D. Gruber

12. Quantitative Polymerase Chain Reaction: Quantitative PCR Using the Comparative Cq Method
Kimberly Yeatts

13. Genomic Analysis by Oligonucleotide Array Comparative Genomic Hybridization Utilizing Formalin-Fixed Paraffin Embedded Tissues
Stephanie J. Savage and Galen Hostetter

14. RNA Mapping Protocols: Northern-Blot and Amplification of cDNA Ends
Maria Lucrecia Alvarez and Mahtab Nourbakhsh

15. High Content RNA Interference Assay: Analysis of Tau Hyperphosphorylation as a Generic Paradigm
RiLee H. Robeson and Travis Dunckley

Part IV: Alternative Approaches

16. Integrative Systems Biology Approaches to Identify and Prioritize Disease and Drug Candidate Genes
Vivek Kaimal, Divya Sardana, Eric E. Bardes, Ranga Chandra Gudivada, Jing Chen, and Anil G. Jegga

17. Identification of a Common Variant Affecting Human Episodic Memory Performance Using a Pooled Genome-Wide Association Approach: A Case Study of Disease Gene Identification
Traci L. Pawlowski and Matthew J. Huettelman

18. RNAi-Based Functional Pharmacogenomics
Sukru Tuzmen, Pinar Tuzmen, Shilpi Arora, Nathalie Meurice, Spyro Mousses, and David Azorsa

19. Genetic Predisposition to α -Thalassemia and Sickle Cell Anemia in Turkey: A Molecular Diagnostic Approach
A. Nazli Basak and Sukru Tuzmen
