## Table of Contents

### Part I. Cloning of the Antigen-binding Site from Hybridoma
- **Cloning of Variable Domains from Mouse Hybridoma by PCR**
  - Stefan Dubel
- **Coning Hybridoma cDNA by RACE**
  - Andrew Bradbury
- **Construction of scFv Fragments from Hybridoma or Spleen Cells by PCR Assembly**
  - Andreas Pluckthun

### Part II. Generation of Antibody Repertoires
- **Mouse Immune Libraries for the Generation of ScFv Fragments Directed Against Human Cell Surface Antigens**
  - Matthias Peipp
- **Human Antibody Gene Libraries**
  - Stefan Dubel
- **Synthetic Antibody Libraries**
  - Pierre Martineau
- **Immune Libraries from Nonhuman Primates (NHP)**
  - Philippe Thullier
- **Generation of Rabbit Immune Libraries**
  - Hermann Gram

### Part III. Selection of Antibody Fragments from Combinatorial Libraries
- **Immunotube Selections**
  - Roland E. Kontermann
- **Phage Display and Selections in Microtitre Plates**
  - Michael Mersmann
- **Phage Display and Selections on Biotinylated Antigens**
  - Daniel Baty
- **Phage Display and Subtractive Selection on Cells**
  - Karlheinz Peter
- **Selection of Phage Antibody Libraries for Binding and Internalization into Mammalian Cells**
  - James D. Marks
- **Improving Phage Display Throughput by Using Hyperphage, Miniaturized Titration and pVIII (g&p) ELISA**
  - Stefan Dubel
- **Yeast Display and Selections**
  - K. Dane Wittrup

### Part IV. Engineering and Production of Immunoglobulins
- **Aspects of Isotype Selection**
  - Jochen G. Salfeld
- **Generation of Heavy and Light Chains (Chimeric Antibodies)**
  - Kirstin A. Zettlitz
- **Humanising Antibodies by CDR Grafting**
  - Tarran Jones
- **Humanization by Resurfacing**
  - Hans Deckmyn
- **Human Antibodies by Guided Selection**
  - Hyo Jeong Hong
- **In Silico De-Immunization**
  - Ignace Lasters
- **Affinity Maturation by Chain Shuffling and Site Directed Mutagenesis**
  - James D. Marks
- **Affinity Maturation by Random Mutagenesis and Phage Display**
  - Holger Thie
- **Engineering of the Fc Region for Improved PK (FcRn Interaction)**
Antibody-Dependent Enzyme Prodrug Therapy (ADEPT)  
Kerry Chester

Production of Recombinant Human IgG Antibodies in the Baculovirus Expression System  
Stefan Dubel

Expression of IgA Molecules in Mammalian Cells  
Thomas Valerius

Part V: Antibody Characterization
Expression of Complete Antibodies in Transgenic Plants  
Udo Conrad

Expression of Full Length Monoclonal Antibodies (mAb) in Algal Chloroplast  
Stephen P. Mayfield

Expression of IgG Antibodies in Mammalian Cells  
Jiandong Li

Protein A/G Chromatography  
Kirstin A. Zettlitz

Epitope Analysis Using Synthetic Peptide Repertoires Prepared by SPOT Synthesis Technology  
R. Frank

Epitope Mapping by Printed Peptide Libraries  
Ralf Bischoff

Antibody Epitope Mapping Using Yeast Display  
James D. Marks

Size Exclusion Chromatography  
Holger Thie

Structural Characterization of Antibodies by Mass Spectrometry  
Alain Beck

Antibody Glycans Characterization  
Alain Beck

Affinity Measurements by Competition ELISA  
Pierre Martineau

Anti-Histidine Antibodies as Tools for Reversible Capturing of His-Tagged Fusion Proteins for Subsequent Binding Analysis  
F.W. Herberg

Affinity Measurements Using Quartz Crystal Microbalance (QCM)  
Thomas Johansson

Affinity Measurements with Radiolabeled Antibodies  
Peter Scheurich

Neutralization Tests  
Dorothea (Thea) Sesardic

Functional Characterization of Antibodies Neutralizing Soluble Factors In Vitro and In Vivo  
Jochen G. Salfeld

Competitive ELISA  
Torsten Meyer

Quantification of Human IgG and Related Fc Fusion Proteins by a Human IgG/Fc Capture ELISA  
Thomas Schirrmann

Determination of Fc-Mediated Antibody-Effector Functions by Chromium Release Assay  
Tina Otz

Binding Studies with Flow Cytometry  
Thomas Schirrmann

Index
