## Table of Contents

### I. General Aspects of External Fixation
1. Introduction
2. Brief Historical Background, Classification
3. Advantages and Disadvantages, Indications and Contraindications
4. Equipment
5. Terms and Designations of External Fixator Constructs
6. Biomechanical Principles
   6.1. Relationship of Transosseous Elements (K-wires, Half-pins) to Surrounding Tissues
   6.2. Control of Bone Fragment Position
   6.3. Control of Bone Fragment Stability
7. Contradictions of External Fixation. Combined External Fixation (CEF)
8. Method of Unified Designation of External Fixation
9. Atlas for Insertion of Transosseous Element "Reference Positions" (8 levels for each segment)
10. Preoperative Planning
11. Principles of Frame Construction
12. References

### II. Specific Aspects of External Fixation
1. Introduction
2. Humeral Fractures
   2.1. Proximal Humerus (11-)
   2.2. Diaphyseal Fractures (12-)
   2.3. Distal Humerus (13-)
3. Forearm Fractures
   3.1. Proximal Forearm (21-)
   3.2. Diaphyseal Fractures (22-)
   3.2.1. Ulnar Diaphysis
   3.2.2. Radial Diaphysis
   3.2.3. Diaphysis of the Radius and Ulna
3.3. Distal Forearm (23-)
4. Femoral Fractures
   4.1. Proximal Femur (31-)
   4.2. Diaphyseal Fractures (32-)
   4.3. Distal Femur (33-)
   4.4. Patella (91.1-)
5. Tibial and Fibular Fractures
   5.1. Proximal Tibia and Fibula (41-)
   5.2. Diaphyseal Fractures (42-)
   5.3. Distal Tibia and Fibula (43-)
   5.4. Ankle Injuries (44-)
6. Compound Fractures
7. Malunited Fractures
8. Correction of Long Bone Deformities
   8.1. Technical Tips and Tricks for the Humerus and Forearm
10. Non-Unions, Pseudoarthroses and Long Bone Defects
11. Combined Strained Fixation of Long Bones (CoSF)
   11.1. Equipment for CoSF and Principles of Application
   11.2. Humerus
   11.3. Femur
   11.4. Tibia
   11.5. Forearm
   11.6. Clavicle
   11.7. Postoperative Protocol
12. Pelvis Injury
12.1. Malunited Pelvic Fractures
13. Foot
   13.1. Forefoot Injuries
   13.2. Midfoot Injuries
   13.3. Hindfoot Injuries
   13.4. Correction of Foot Deformities
14. Large Joint Pathology
   14.1. Shoulder
   14.2. Elbow
   14.3. Wrist
   14.4. Hip
   14.5. Knee
   14.6. Ankle
15. Infectious Complications of Long Bone Fractures
16. Features of External Fixation in Children, Elderly and Senile Patients
17. General Principles of Patient Management in Postoperative Period
Mistakes and Complications of External Fixation 19. References
